

EXPRESSION OF CONCERN

Open Access

Expression of Concern to: Decreased miR-198 expression and its prognostic significance in human gastric cancer

Zhigang Cui, Xin Zheng and Di Kong*

Expression of Concern to: *World J Surg Oncol*

<https://doi.org/10.1186/s12957-016-0784-x>

The Editor-in-Chief is issuing an editorial expression of concern to alert readers that this article [1] contains substantial overlap with articles published within a close time frame [2–5]. None of the authors have responded to any correspondence from the editor or publisher about this editorial expression of concern.

Ready to submit your research? Choose BMC and benefit from:

- fast, convenient online submission
- thorough peer review by experienced researchers in your field
- rapid publication on acceptance
- support for research data, including large and complex data types
- gold Open Access which fosters wider collaboration and increased citations
- maximum visibility for your research: over 100M website views per year

At BMC, research is always in progress.
